## EXPERIENCE

### **Infosys Limited, Chennai— Technology Analyst**

April 2018 - PRESENT

### **Infosys Limited, Chennai — Senior Systems Engineer**

January 2015 - March 2018

### **Startup, Chennai— Software Engineer**

May 2012 - December 2014.

## EDUCATION

### **Narayana Engineering College, Gudur— B.Tech**

2008 - 2012

## PROJECTS

### **Video Analysis 4K — ReactJs .Node Js**

Web application layer for ffmpeg to analyze the video quality .

Was responsible for Complete design and development .

Involved in components splitting , integration , code review ,feature delivery and presentation .

Have used ChartJs for report generation .

### **Test Intelligent Predictor — ReactJs .Python Flask**

Web application layer for machine learning model to predict test results.

Was responsible for creation of flask API ,React front end .

Involved in design and development of api, ReactJS integration, build and deployment .

Have used Material UI for user input and react base table for results .

### **API Tester — ReactJs .NodeJs**

Web application to post a request from the server.

## SKILLS

Web Development, React JS

JavaScript ,HTML,CSS

MongoDB , NodeJs,

SemanticUI, Twitter Bootstrap,  
Material UI, UX Engineering,

Java,Python,Selenium ,TestNG,

## INTERESTS

UX and UI Design , Internet of Things ,Prototyping .

## AWARDS

**Most Valuable Player** for exemplary performance in the team.

**Best Team Award** for contribution in the organization development

**Insta Award 1** for development of internal tools used by clients

**Insta Award 2** for mentoring fresh recruits in smooth transition into projects..

## LANGUAGES

English , Telugu ,Hindi ,Tamil

Designed and developed a React + node app that runs on client server and can post to other client services so that only access to the react app is enough to test the client services .

Have used axios for post and get requests at node end.

### **IPDB — *ReactJs .NodeJs***

Web application to store the IP enabled to access the client network.

Designed and developed a React + node app that connects with mongodb database to store the IP details .

Have used Mongoose with NodeJs for data handling.

### **Inventory Overview –*ReactJs .NodeJs***

Web application dashboard to provide the stock status of each warehouse.

Each warehouse has a stock of different items and uses legacy systems to manage them.

We created node services that consumes the legacy data and gives json responses for use at React app .

Have used Axios ,ChartJs for different layouts.

### **Video Testing for Comcast –*Java,Python,Selenium , TestNG, ALM***

Test automation scripting using Selenium, Java, Test NG.

Performs End to end regression testing.

Test reporting and defect reporting in ALM.

Involved in daily scrum calls for status updates,PM Activities.

Creating reusable tools for testing .

### **Comcast QA support for Compass(NGB) –*Java,Python,Selenium , TestNG, ALM***

Analyzing requirements and Test planning,End to end regression testing,UX and Functional Testing.

Test status , Defects reporting,Analysis of existing automation test suites.

Design and development of automation scripts using Selenium, Test NG.

Automation test execution.,HP ALM and Rally integration of test reports.

Manage test runs using Jenkins,custom test reports using Extent Reports.

## PERSONAL PROJECTS

### **Livingman.in** -HTML,CSS,Javascript , Wordpress

A simple clothing ecommerce store with wordpress

<https://livingman.in/>

### **saltedchilli.app** -ReactJS, NodeJs,Express , MongoDD,scss

A simple flashcard style app to refresh basic web technologies.

<https://www.saltedchilli.app/>

### **yatheesh.dev** -ReactJS, HTML,CSS,JavaScript ,scss

Personal portfolio website - work in progress

<https://yatheesh.dev/>

### **Company Website** -ReactJS, HTML,CSS,JavaScript ,scss

Sample company website - work in progress

<http://team170.herokuapp.com/>

### **Local Chat (UI Design)-Figma**

UI design prototype / wireframe using figma .
